

Silence Unknown Callers on iPhone

iOS 18 — send unknown numbers straight to voicemail

1

Open Settings

Tap "Apps" then tap "Phone"

2

Tap "Screen Unknown Callers"

Scroll down to find it under Call Filtering

3

Select "Silence"

Calls from unsaved numbers are silenced and sent to voicemail

4

Optional: select "Ask Reason for Calling"

Caller is screened by Siri before your phone even rings

How it works

- Contacts always ring through normally
- Recent callers and Siri suggestions also ring through
- All other numbers are silenced and sent to voicemail
